NATIONAL INSTITUTE OF OCEAN TECHNOLOGY (NIOT, CHENNAI)
OPERATION NET-ZERO: TACTICAL RECOVERY DISPATCH ORDER

[DEMO MODE ACTIVE] This mission report contains simulated / demo acoustic survey data. Not for live maritime navigation.

Incident Ref ID:	INC-GHOST-NET-001	Issue Timestamp:	2026-09-26 18:30:00 UTC
Dataset / Source:	DRISHTI SSS Synthetic Split (CC-BY-SA-4.0)	AUV Asset:	NIOT Autonomous Surveyor-II

1. ACOUSTIC ANOMALY SPECIFICATION & MEASUREMENT PROVENANCE

Parameter	Value / Reading	Scientific Provenance
Anomaly Class:	GHOST_NET-CLASS CONTACT	MEASURED (ONNX Tiled)
AI Confidence:	92.9%	MEASURED (Class Prob)
Target Elevation:	4.12 m	DERIVED (Trigonometry)
Seafloor Depth:	24.5 m	ASSUMED (Altimeter)
Coordinates:	GPS unavailable — image-space tracking only	UNAVAILABLE

2. MULTI-PING TEMPORAL TRACKING & CONTACT PERSISTENCE

Track Identifier:	TRK-NET-01	Persistence Status:	PERSISTENT
Observations:	4 consecutive pings	Track Age:	42.5 seconds elapsed

3. SYSTEM-1 EDGE REFLEX TELEMETRY (CONVAIINNOVATIONS/LAYA)

Reflex Decision:	EVADE_HAZARD
Hazard Severity Score:	8.7 / 10.0 (Deterministic Guardrail)
Execution Latency:	28.4 ms (Sub-35ms Non-Autoregressive)
Safety Disclaimer:	Advisory only — no direct vehicle control without operator authorization.

4. SYSTEM-2 TACTICAL REASONING BRIEFING (qwen/qwen3.8-27b (Groq Cloud) — ACTIVE)

Incident Summary:	Derelict fishing gear contact identified in active survey corridor. Entanglement hazard to propulsion.
Recovery Priority:	CRITICAL
Operator Directive:	Execute evasive turn starboard 30 degrees and mark clearance waypoint.
Sensor Uncertainties:	- Exact anchoring tension to seabed unknown - Current drift vector unmeasured
